PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years building and scaling web applications using Angular, React, and modern JavaScript. Proven track record leading small frontend teams, improving code quality and application performance, and delivering enterprise dashboard, e-commerce, and travel-domain platforms end to end. Strong collaborator across QA, design, and product functions.

KEY ACHIEVEMENTS

- Led a team initiative that increased code efficiency by 30% over six months through refactoring and process improvements.
- Reduced production bug rate by 25% by strengthening testing procedures and code review standards.
- Built an analytics dashboard that improved data analysis speed by 40%, enabling faster business decision-making.
- Shipped new UI features that increased user engagement by 15%.

EXPERIENCE

Senior Software Engineer Apr 2023 – June 2026

Omnicom Media Group (Annalect)Bangalore, India

- Led and coordinated a team of three senior frontend developers, overseeing development activities, code quality, and delivery.
- Collaborated closely with UI/UX designers on a day-to-day basis to clarify requirements, resolve design-related issues, and recommend necessary improvements for better usability and technical feasibility.
- Leveraged AI-assisted UI/UX design workflows to transform design concepts into application structures and implementation-ready solutions, reducing the need for manual coding in initial development stages.
- Reviewed and tested code contributions to ensure high test coverage, maintainable architecture, reusable components, and reduced defects during development.

Associate Software Engineer Mar 2021 – Apr 2023

Altudo Consultancy Services Pvt. Ltd.Gurgaon, India

- Built reusable, high-performance Angular components aligned to client coding standards, improving application maintainability and reducing page load times.

Associate Software Engineer May 2019 – Mar 2021

RebusCode Information SolutionsGurgaon, India

- Led a team of 2 frontend developers to build a React-based sales analytics dashboard, giving clients an interactive, responsive way to compare sales performance against competitor products.

Associate UI Developer Feb 2018 – Apr 2019

Edynamic Softech Solutions (Altudo)Gurgaon, India

- Developed frontend UI components with jQuery and JavaScript to handle event triggers and toggle functionality, used by a backend team of 25 developers to integrate into C#-based modules.

Junior Frontend Developer Jan 2017 – Jan 2018

Logiciel Solutions Pvt. Ltd.Ludhiana, India

- Gained hands-on experience with Angular 2 as part of a two-person team, learning the framework while implementing an internal Leave Management System.

SELECTED PROJECTS

Media Ops Platform Apr 2023 – June 2026

- Developed and enhanced a platform for managing client information and advertising campaign placements, incorporating budget tracking and estimated-budget recommendations to support effective campaign planning and client management.
- Owned and contributed to the Table and Edit modules within a Micro Frontend architecture, enabling seamless in-table data editing as well as a dedicated, feature-rich interface for managing and updating complex data.
- **Technologies & Tools:** React.js, TypeScript, Postman, Jira, Git, Figma, GitHub Copilot.

IDP (Internal Project — FIS) Mar 2021 – Apr 2023

- Built an internal employee-management platform using Angular 12 in a multi-module architecture, with tree- and table-based views for employee records and workflows.
- **Technologies & Tools:** Angular, TypeScript, Postman, Jira, Git, Figma, GitHub Copilot.

Analytics Dashboard (Delta, KMT, Albertson) Feb 2018 – Apr 2019

- Transformed raw operational data into interactive visual reports using multiple Angular modules and charting libraries, improving stakeholder data comprehension.
- **Technologies & Tools:** Angular, TypeScript,Node.js,Angular Material, Azure DevOps, Postman, Jira, Git.

.

Travel Booking Platform (Cox and Kings, FreeGoOne) Feb 2018 – Apr 2019

- Developed core search and booking functionality across Hotel, Flight, Activity, Car, and Holiday modules for a multi-vertical travel platform.
- **Technologies & Tools:**JavaScript,JQuery,Json, Jira, Git.

Wallet & Payment Portal Plugins

- Built companion payment and wallet features using jQuery and JavaScript, deployed site-wide across the frontend.
- **Technologies & Tools:** JavaScript, JQuery, Json, Gitlab..

Refer.to (Referral Marketing Platform) Jan 2017 – Jan 2018

- Contributed to a referral-marketing product that automated advocate enrollment, tracking, and rewards.
- **Technologies & Tools:** JavaScript,JQuery,Angular.js, Emberjs, Json, Jira, SVN.
